## 1. Your AI Job Search Toolkit

Gamma.app – Create instant slide decks.

ChatGPT – Resume, outreach, and interview coach.

Google Gemini – Research companies & generate insights.

Perplexity.ai – Lightning-fast fact search with sources.

Claude.ai – Long-form writing and strategy aid.

Deepseek – Code or data-driven career assistant.

NotebookLM – Summarize docs & track your learning.

Notion Job Tracker – Manage applications & follow-ups.

LinkedIn Career Explorer – Discover new roles & skill paths.

## 2. LinkedIn Job Search Tricks

- Use the filter: **'Date Posted → Past 24 hours'** to find fresh jobs.
- Add keywords like **'AI'**, **'Remote'**, or **'Contract'** to narrow relevance.
- Sort by **'Most Recent'** not 'Most Relevant' for new opportunities.
- Use Boolean search: **(AI OR "Machine Learning") AND (Engineer OR Developer)**.
- Turn on job alerts for specific roles & companies.

## 3. Power Prompts for Every Stage

- Decode JD → "Extract top 10 keywords and must-have skills from this job posting."
- Rewrite Bullets → "Rephrase this using STAR-R and add measurable impact."
- Quantify Impact → "I led [X]. Estimate time/cost savings or efficiency gained."
- Executive Summary → "Write 4-5 line profile highlighting achievements."
- ATS Fix → "Compare my resume vs this JD and suggest missing keywords."
- Tailor Resume → "Adjust this resume to match the language of this JD."
- Post-Interview → "Write a short thank-you email referencing what we discussed."
